

# Grants DEPARTMENT

The Grants Department at Tolleson Union High School District secures, manages, and monitors federal and state funding to enhance educational programs and services across the district. The team supports schools and departments by identifying grant opportunities, ensuring compliance with funding requirements, and aligning resources with district priorities to promote student success. Specialized staff provide targeted support for key programs such as 21st Century Community Learning Centers, McKinney-Vento, Native American Education, and more. Through financial oversight, community engagement, and direct student support, the department helps remove barriers to learning and maximize the impact of available resources.
