

why choose THE IB MYP?

For many reasons, including:

- Internationally recognized curriculum that develops the whole student
- Inquiry-based learning that encourages students to ask questions and think independently
- Interdisciplinary units that show connections across subjects
- Service as Action projects that make a difference in our community
- Strong foundation for the IB Diploma Programme in grades 11-12

Academic Excellence with Purpose

The MYP curriculum includes eight subject groups:

- Language and Literature
- Language Acquisition
- Individuals and Societies
- Sciences
- Mathematics
- Arts
- Physical and Health Education
- Design

Students explore these subjects through conceptual understanding, developing skills they'll use throughout their lives.

What Makes MYP Different?

Students engage in interdisciplinary learning that mirrors how we solve problems in the real world. Rather than memorizing facts, MYP students develop Approaches to Learning skills: communication, social, self-management, research, and thinking skills that transfer to any challenge they face.

The Personal Project: Your Showcase

- In grade 10, every MYP student completes a Personal Project — a self-directed exploration of a topic they're passionate about. Students identify a goal, plan their approach, create a product or outcome, and reflect on their learning. It's an opportunity to demonstrate creativity, take action, and develop project management skills.

Service as Action: Making a Difference

- MYP students engage in meaningful service throughout the programme. Whether tutoring younger students, organizing community events, or addressing environmental concerns, students learn that their actions matter and they have the power to create positive change.
