

Vaccination is one of the best ways parents can protect infants, children and teens from potentially harmful diseases. A prolonged illness from a vaccine preventable disease can take a financial toll because of lost time at work, medical bills or long-term disability care. Vaccine-preventable diseases can be very serious, may require hospitalizations, or even be deadly—especially in infants and young children. Vaccines have reduced and, in some cases, eliminated many diseases that killed or severely disabled people just a few generations before. If you have any questions, please contact your school nurse.

What immunizations does my child need to attend school in California?

Under California law, children are required to receive certain immunizations to attend public and private elementary and secondary schools, child care centers, family day care homes, nursery schools, day nurseries, and developmental centers.

Schools and child care facilities must enforce immunization requirements and maintain immunization records of every child enrolled.

Required immunizations

TK immunization Requirements - for students who are 3 years of age at the time of enrollment:

- 3 Polio
- 4 DTaP
- 3 Hep B
- 1 MMR (on or after their first birthday)
- 1 Varicella

*Once your child turns 4 years of age, they must meet the TK-12 Immunization Requirements.

Children entering transitional kindergarten through grade 12 must have the following immunizations:

- 4 Polio (3 doses meet the requirement if at least one was given on or after the child's fourth birthday)
- 5 DTaP (4 doses meet the requirement if at least one was given on or after the child's fourth birthday; 3 doses meet the requirement if at least one was given on or after the child's seventh birthday)
- 3 Hep B
- 2 MMR (both doses must be given on or after the child's first birthday)
- 2 Varicella (also known as the chickenpox vaccine)

Children entering grades seven through 12 must have:

- All of the above plus 1 Tdap booster shot given on or after the child's seventh birthday

Please reach out to the school office manager or health office if you have questions.

Medical Exemptions

On June 30, 2015, Gov. Jerry Brown signed into law Senate Bill 277, which states that personal and religious belief exemptions for vaccinations will not be allowed in California daycare, preschools and TK-12 settings. The law took effect on July 1, 2016.

As of January 2021, medical exemptions, either permanent or temporary, can only be issued through the state Department of Public Health's California Immunization Registry Medical Exemption (CAIR-ME) website by physicians licensed in California. Schools may only accept new medical exemptions that are issued using CAIR-ME.

Effective January 1, 2021: Schools and child care facilities may only accept medical exemptions that are issued through [CAIR-ME](#).
