PROGRAM RECAP

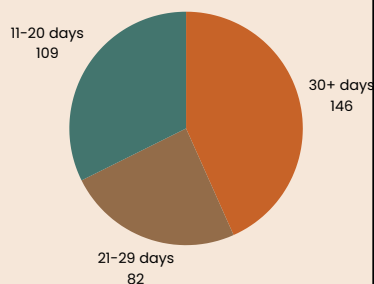

Copper Canyon High School's Aztec Academy proudly celebrated its third year in 2025, marking a period of significant growth in student, staff, and family engagement. More than 40 dedicated staff members supported our after-school and summer programming, and the impact on academics was clear: 88% of regular attendees earned a C or better in ELA, and 85% achieved a C or better in Math.

This year, Aztec Academy expanded its offerings to spark curiosity and engagement for every interest. Students built strength and endurance through pre-season sports conditioning, honed critical thinking in Tabletop Gaming and Chess Club, and unleashed their creativity in Creative Commons programs, including art and the Cricut Creation Station. STEM enthusiasts thrived in Lego Wars and Gaming from the Ground Up, while culinary-minded students developed new skills in Monte's Kitchen.

It was an exceptional year for Aztec Academy, and we are excited to continue inspiring, supporting, and empowering students as the program grows even stronger.

STUDENT ATTENDANCE

We had 907 students attend 1 or more days of the program. Of those students, 146 attended for 30 days or more, helping us achieve our program goal.

STUDENT CONNECTIONS

100%
of participants reported a positive connection with a staff member

100%
of participants reported a positive connection with a peer

71%
of participants reported an overall positive feeling toward school

Via an online poll, students shared their positive connections to staff, other students, and school as a whole.

ACADEMICS

Supporting freshmen as they begin high school is one of our top priorities. The first year can be both exciting and challenging, and Aztec Academy provides the guidance, connections, and resources students need to thrive. By building confidence and a strong sense of belonging, the program lays the foundation for success throughout high school and beyond.

88%
of freshmen who attended 30 days or more received a C or better in ELA

85%
of freshmen who attended 30 days or more received a C or better in math
