

Letter Home for Future Honors Math Students

If you have received this letter, your student is signed up to take an honors math course at Crismon for the 2026-2027 school year. In order for our students to reach success, they will need to utilize concepts previously learned. For this reason, we are providing an optional review assignment to be completed over the summer. This optional assignment will also serve as a basis of preparing for a review assessment that will be given during the first week of school.

Directions for Delta Math:

- The assignment can be found using Delta Math (www.deltamath.com)
- Click on "For Students"
- If you already have a log in, log in with your school email. If you do not, please register using your school email.

In order to find the assignment, choose the appropriate code for your 26-27 honors course:

Honors 7th: **8P9P-3BW5**

Honors Algebra 1: **RU4S-6ZM9**

Honors Geometry: **35A8-DT4E**

Honors Algebra 2: **A98M-V9QH**

For AP Pre-Calculus and AP Calculus:

The assignments for these classes are not in Delta Math. Students will need to pick up a hard copy of the assignment at the CHS front office if they did not receive a copy before summer break.

Thank you for choosing to take an honors math course, we look forward to excelling your math skills this school year!
