

Introducing the 95 Phonics Lesson Library™

Help your students achieve grade-level success.

Guide students to grade-level mastery with 95 Phonics Lesson Library™. This evidence-based program for intervention gives students the targeted intervention they need to fill specific skill gaps.

95 Phonics Lesson Library™ breaks phonics proficiency into 75 discrete skills and provides instruction on each, ensuring that each student's unique needs are met with explicit instruction.

- Experience ease of implementation with clear, consistent lesson layouts and ready-to-use instructional dialogue for minimal teacher prep.
- Meet each child's individual needs with lessons that are mapped specifically to each child's skill level on the continuum.
- Get built-in practice opportunities with gradual release support.
- Focus students on skill mastery with routine-based instruction.

Assessing where readers are struggling with their phonics and decoding skills is essential to mapping each child's path to word fluency. Use **95 Phonics Screener for Intervention™ (PSI™)** to pinpoint skill deficits and determine exactly where instruction should begin. The PSI™ is available to teachers using **95 Phonics Lesson Library™**.

The 95 Phonics Lesson Library™ is available in three phonics skill levels—**Basic, Advanced, and Multisyllable**—to help each child make progress.
