

Superintendent and Principal Visit Phoenix Raceway

LESD#65 Partnering with Phoenix Raceway

Littleton ESD knows that in order to Build Tomorrow Together, we need to work together with our students, staff, families, community and partners! Our partnership with *Phoenix*

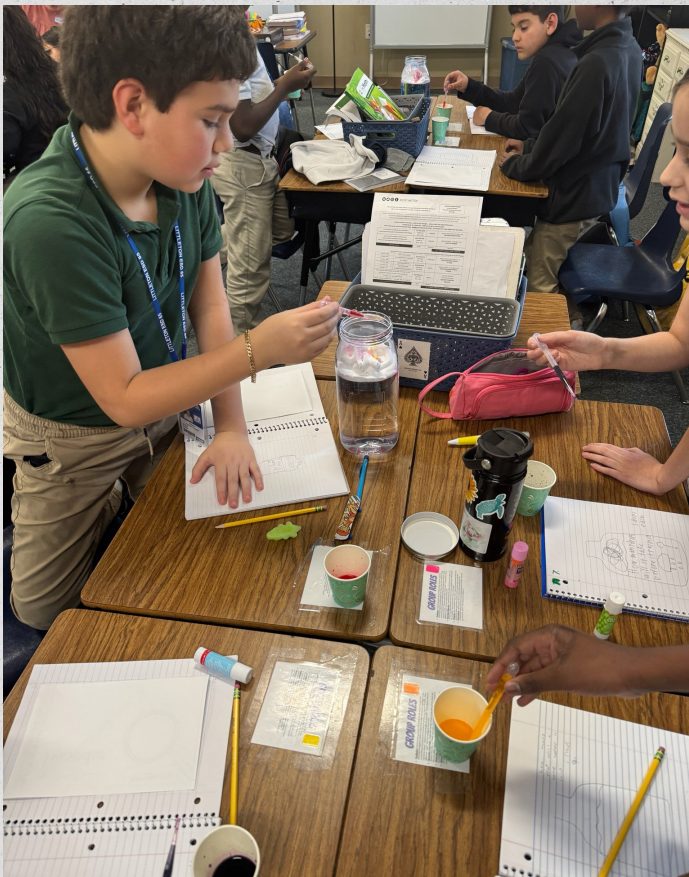

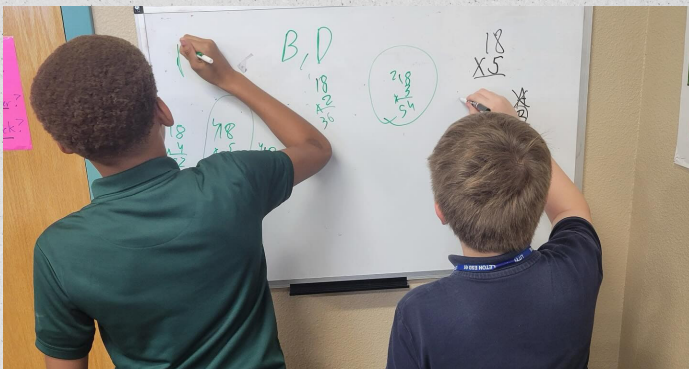

Raceway and NASCAR has made such a positive impact on our Littleton Community. Dr. Laffitte and Ms. Armstrong were invited to an event at the raceway to continue to build that partnership to even higher levels for our community!

Collier

In Ms. McAlear's 6th grade class, students are exploring division of fractions, greatest common factor, and least common multiple through real life problem solving situations. They are challenged with higher level reasoning and application to deepen their understanding.

Country Place

It's been dry and hot in Arizona, but at Country Place, 5th graders were busy making rain. While exploring the scientific method, students developed hypotheses for how many drops it would take to make the cloud too heavy and release rain.

They wrote and illustrated their observations, reflected, and made conclusions. Now if only the Mustang scientists can really make it rain.

Estrella Vista

The Kindergarten Welcome Night offered families an introduction to the curriculum, kindergarten events, and Title 1 information, courtesy of Ms. Armstrong.

We acknowledge and thank families for their instrumental role in promoting student learning and growth. Their involvement is essential.

Exciting news from Freeman Fine Arts! Ms. Castro has opened up the library for classes to check out books and enjoy fun reading activities. This week, Ms. Kelly's and Ms. McGinley's classes had a blast reading If You Give a Mouse a Cookie! We love seeing our Falcons dive into stories that spark imagination and a love for reading!

Freeman Fine Arts

This past week, our 7th grade Falcons at Freeman Fine Arts explored the Middle Ages! Check out this incredible mural featuring medieval-inspired art created by Ms. Mijangos' history classes.

We're so proud of the creativity and hard work our students put into bringing history to life!

Lakin Prep

We want to send a huge thank you to *Phoenix Children's Hospital* for visiting Lakin Prep campus! Our 4th graders had a blast learning about bike and pedestrian safety. And we had so much fun putting our new skills to the test during the bike rodeo! We are so grateful for this amazing partnership and the free bike helmets they provided for our 4th graders!

Littleton STEM

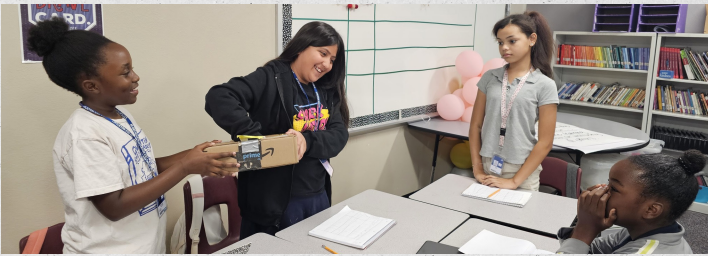

What an EPIC assembly! Huge shout-out to our amazing students and staff for their hard work and achievements. You make us proud!

Quentin

Our 5th graders dove into the inquiry process by making predictions about a mysterious box, what could be inside? Meanwhile, our 3rd graders got up and moving with an interactive activity exploring different sentence types! We are so thankful to have educators who make learning fun and innovative each day, empowering our students for future success!

Tres Rios

Thank you to all the families who came out to our Puma Nation Party to view our curriculum!

Thank you to our community support with dinner and desserts: Baja Snacks & More, Tikiz Shaved Ice and Ice Cream!
