“Economies of scale through (RECs) allow districts to leverage limited resources into targeted support for multiple schools and to share costs with other school districts. RECs must also be accountable to their customers, react to the marketplace, act as entrepreneurs, and respond to federal, state, and local district needs.”

Rod Paige, Past-U.S. Secretary of Education

ABOUT THE COOPERATIVES

In 1984, the New Mexico State Board of Education established Regional Center Cooperatives (RCCs) under SBE Regulation No. 84.6. In 1993, the New Mexico State Legislature created Regional Education Cooperatives, Act 22-2B-1 to 22-2B-6, NMSA 1978, as “state agencies administratively attached to the Public Education Department”. Unlike educational service agencies in other states, Regional Education Cooperatives (RECs) receive minimal direct, state funding to support the programs and services they provide. Their existence and success depends upon providing programs and services that would otherwise be cost prohibitive to their member districts. The RECs depend upon revenues from contracted delivery of services to districts, grants, inter-governmental agreements, and joint-powers agreements.
