School Facilities Policy Guiding Principles

[NOTE: This policy provides an opportunity for the Board to describe what is important to it and what the Trustees will strive to keep in mind when adopting, reviewing, and editing the other policies in Section 9000. Considering and customizing this policy is intended to act as a focal point for discussion by the Board. Because this policy is not based closely on any section of state or federal law or administrative rules, the Board has a great deal of freedom to edit it to reflect what is important to it, including the District's strategic plan.]

The Board adopts policies on District facilities. In doing so, the Board prioritizes the following principles, aims, and values:

[SELECT, REVISE, ADD TO, AND DELETE THE FOLLOWING AS APPROPRIATE FOR THE BOARD:]

1. The Board shall develop and monitor long range plans to maintain and/or upgrade the buildings and grounds of the District.
2. The life of facilities can be increased with a regular maintenance program monitored by administration.
3. Board planning informed by demographic information about the District is necessary to provide for future facility needs;
4. Keeping facilities clean and well-maintained is important to promoting learning and providing for student safety;
5. Prudent maintenance of facilities is necessary to protect the community's investment in education;
6. The construction and improvement of District facilities will be done in a fiscally responsible manner that reduces cost to the community; and
7. High quality, well-maintained facilities provide an environment that supports learning and shows the value the community places on education.]
